

Bond Brush

Main Function

2-in-1 Device

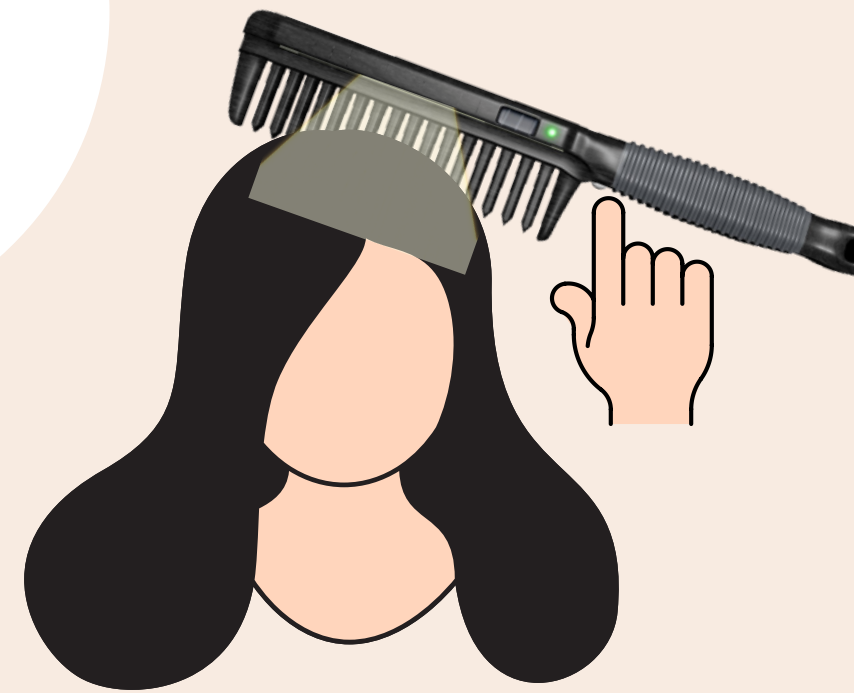

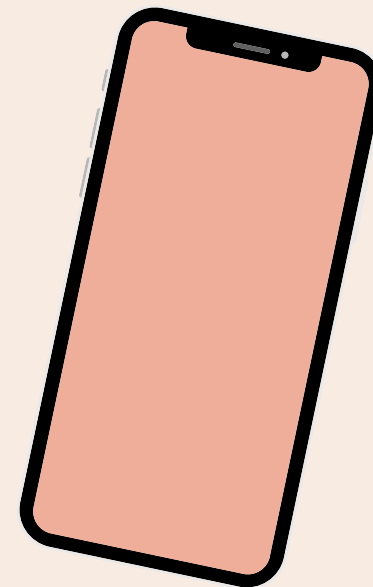

Get professional hair advice, all while just combing your hair!

This comb scans your scalp as you comb your hair.

It then analyses it using algorithms and information in databases.

It then sends the findings to the complementary application, where you will be able to receive comprehensive feedback on your scalp condition.

Receive recommendations of hair products for your current condition, helping you to keep your hair healthy!

How It Works :

The device can act as a day-to-day comb

When desired, just press the button at the side of the comb to start the scalp scanning

The LED strip provides a source of light, which allows the CMOS sensor to analyse the scalp

Information received is sent wirelessly to the app

Get instant feedback to maintain your healthy scalp fuss free!

Product Specifics

Wooden Body

- Durable
- Environmentally friendlier and possess greater benefits for hair health compared to plastic

Solar Cell

- Able to power the comb using solar energy

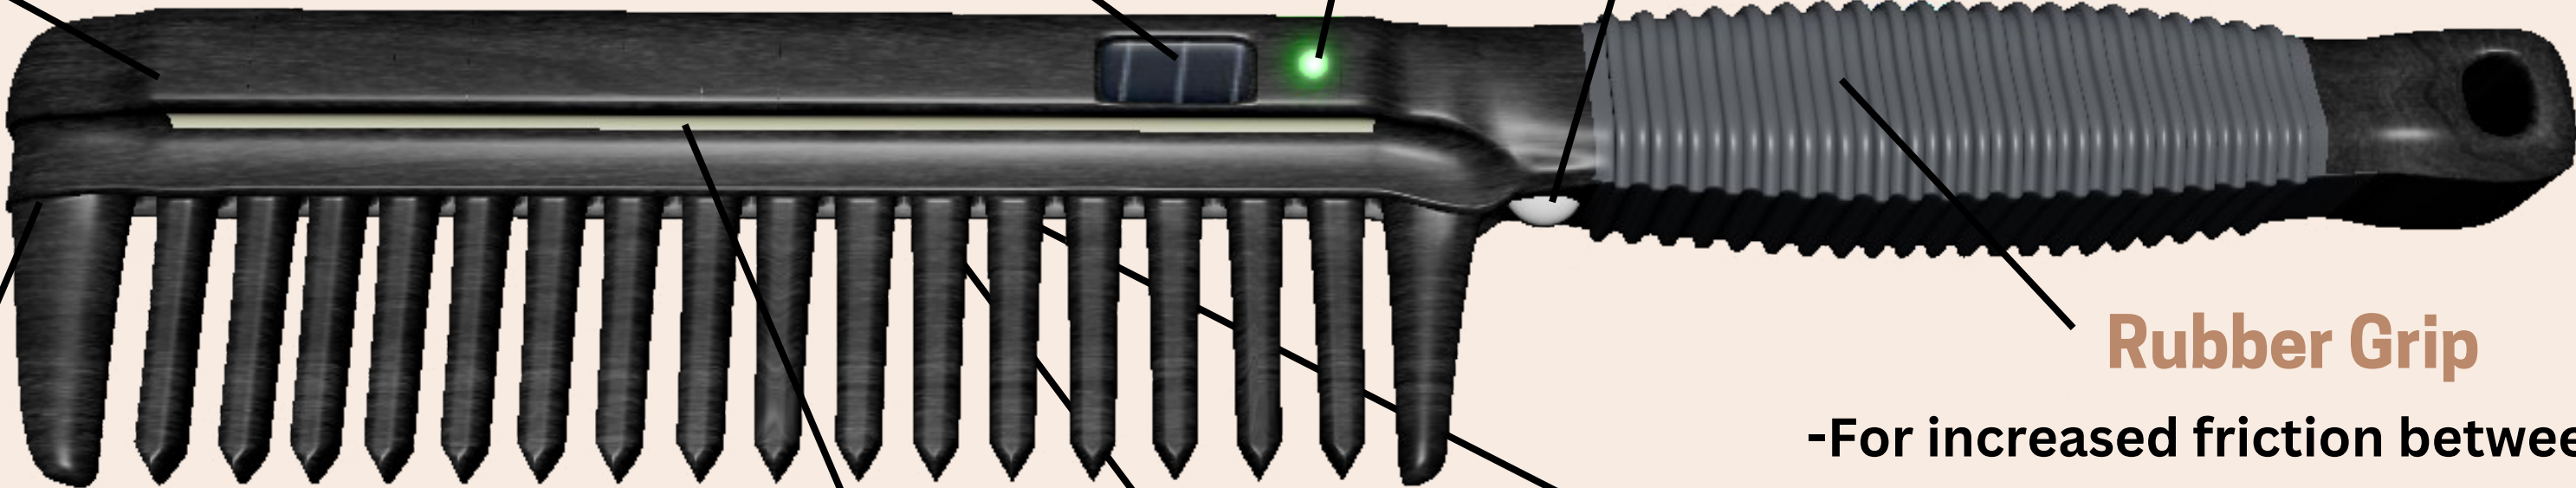

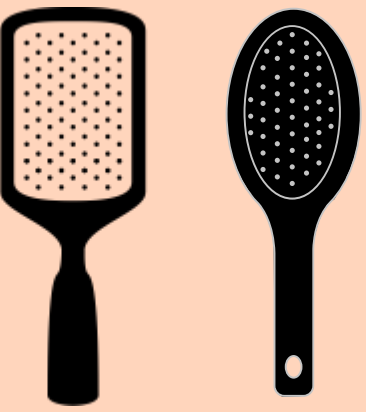

LED Indicator

- For instant health indication
- Green: Healthy
- Red: Unhealthy

Button

- Activates the scanning feature of the comb
